- Jeeyoung Oh (jeeyoung9907@cau.ac.kr)

- Seoyeong Lee (lsyoung66@cu.ac.kr)

Summary

For the final presentation the main work conducted was memorizing the script, preparing PPT, and building the prototype.

What C.C completed this week:
- Prepared the script and PowerPoint slides for the final presentation
- Make indoor test environments to operate the robot
- Build the prototype and operated it on the sand

Things to do by next week
- Will keep building the robot
- Will keep writing the paper

Problems or challenges:
- Left side track did not fit well so the robot did not go straight.
- Wheels did not fit well too so if the robot go for a while, wheels fell off.
- YOLO model was loaded and executed successfully, but the delay between camera and raspberry pi was too long to use it.
